

Patient-Perspective Value Framework (PPVF) Initiative

Avalere Health | An Inovalon Company May 2018

Avalere/*FasterCures*' PPVF Integrates Value, Patient-Centricity, & Methodological Expertise

Avalere/FasterCures Developed a Framework for Patient-Centered Value

PPVF: Patient-Perspective Value Framework

The PPVF has Five Domains, Each Contributing a Different Type of Information to the Framework

PPVF Initiative Phase II Participating Stakeholders

Through First Two Phases, PPVF Initiative has Driven Forward Patient Voice in Value Assessment

Phase I: Develop a Framework (2016 – 2017)

- ✓ Developed a condition-agnostic framework for patient-centered value assessment
- ✓ Solicited input and synthesized 100 public comments
- ✓ Gathered patient input via surveys/focus groups
- ✓ Released Version 1.0 (infographic and methodology report) to the public*

Phase II: Test & Refine (2017 - 2018)

- ✓ Quantified scoring methodology & illustrated its components in 2 condition areas
- ✓ Co-developed with patients a prototype for a shared decision-making (SDM) tool
- ✓ Created foundation for technical advancement of PPVF components in external value assessment

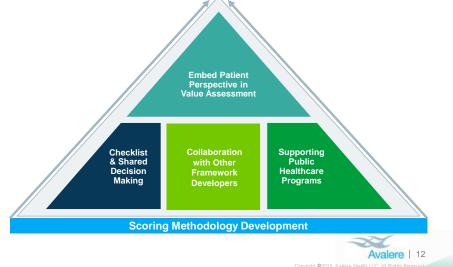

*Version 1.0 materials can be found at the following link: http://avale.re/2pJsAd1

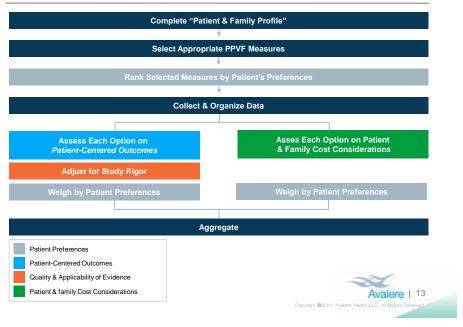

Each PPVF Phase II Workstream Supports Increasing the Patient Perspective in Value Assessment

Quantifying the scoring methodology at the individual and population level serves as foundation for applications

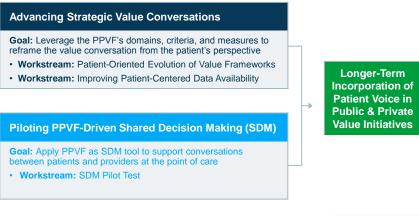

Overarching Scoring Approach

Phase III Will Focus on PPVF Applications & Implementation

PPVF Phase III Objective: Translate PPVF scoring methodology into shared decision-making tools and evolving value assessment

Piloting PPVF-Driven Shared Decision Making: Workstream Goal & Key Activities

Piloting PPVF-Driven SDM		Goal: Apply the PPVF as an SDM tool to support conversations between patients and providers at the point of care			
Workstream	Key Activities		Condition-Focus (If Applicable)		
SDM Tool Pilot	 Continue to leverage a human-centered design approach, deploy pilot test(s), and conduct evaluation 		 Initial prototype is in metastatic breast cancer Intention to expand to other condition areas, pending identification partners and securing resources 		
000 (11)	patient worker	s, some of their family members, an	ype, partnering closely with CancerCare, 15 d a handful of providers (oncologists and social o-development and pilot testing in metastatic ing in other condition areas*		

*Further details regarding deliverables and timelines can be found on slide 11

Thank You
