

Membership

Become a member of the global health economics and outcomes research community

For more than 20 years, ISPOR has been connecting and collaborating with international stakeholders who share a common goal: to improve healthcare decisions. With more than 20,000 individual and chapter members from 110+ countries worldwide, ISPOR members lead the field in advancing the science that informs healthcare decisions.

Member Benefits

Global Scientific Conferences

Healthcare stakeholders from around the world convene at ISPOR's world-class scientific conferences to exchange ideas, collaborate, and network with a community of researchers that work together to advance the science of health economics and outcomes research (HEOR). ISPOR hosts large annual conferences in North America and Europe, biennial conferences in Asia Pacific and Latin America, regional conferences, and topically focused summits.

Education and Training

ISPOR is committed to providing state-of-the-art education and training programs that promote the understanding and use of HEOR methods and analyses to inform and improve healthcare decisions. Led by world-renowned faculty, ISPOR's *Essential HEOR Education* programs cover a wide array of topics and provide instruction at all professional levels. Learn new skills and advance your career by attending ISPOR's preconference short courses, in-depth training programs, and webinars.

Publications

Members have unrestricted online access to ISPOR's MEDLINE®-indexed journals, *Value in Health* and *Value in Health Regional Issues*. Members also receive a monthly eBulletin and regional newsletters, and are eligible for discounts on ISPOR books. In addition, the global HEOR community can access *Value & Outcomes Spotlight* online for the latest news and developments in the field, emerging HEOR trends, and ISPOR-led initiatives.

HEOR Resources

Leveraging the diverse expertise, geographies, and perspectives of its members, ISPOR working groups have developed a rich repository of HEOR resources that set the standard for research excellence in the field. ISPOR's Good Practices for Outcomes Research Reports, Health Technology Assessment Central, Scientific Presentations Database, Global Healthcare Systems "Roadmaps," Pharmacoeconomic Guidelines, and much more are freely available online to everyone in support of the Society's mission.

Global Groups

Members of the Society's global groups (ie, chapters, networks, and consortia) help to advance the science by facilitating the translation of HEOR research into practical information for healthcare decision makers. Currently, ISPOR has more than 80 regional chapters and 100 student chapters, in addition to 3 consortia and 2 networks. This expanding member base allows the Society to share information with members across the globe and helps ensure that the work conveys an international perspective.

Networking

Delegates who attend ISPOR conferences or participate in working groups and training programs have the unique opportunity to connect, communicate, and collaborate with a diverse group of healthcare stakeholders. This international, multistakeholder group includes researchers and academicians, assessors and regulators, payers and policymakers, the life sciences industry, healthcare providers, and patient engagement organizations.

Awards and Recognition

Annual awards recognize the scientific achievement and outstanding leadership of ISPOR members who have made substantial contributions to the field.

Career Development

HEOR professionals seeking career opportunities and employers seeking to reach candidates in the field will find the tools they need to make the right connections through the ISPOR Career Center. Online tools and customized searches help connect employers and candidates to international opportunities in the HEOR field.
