

ISPOR's Abstract Policy

ISPOR does not accept abstracts that have been previously presented at another meeting and/or previously published (either in print or online) by another Society or journal.

Abstracts previously accepted and published by ISPOR may be submitted to another meeting (ie, republished as “encore” abstracts by the same authors) provided that: (i) the subsequent conference allows it; (ii) copyright requirements are followed; (iii) prior presentations are disclosed and cited; and (iv) the primary purpose of the repeated presentation is to reach a different audience.

Before presenting or republishing an abstract at a different meeting or journal, authors must first notify the organizers of the other meeting that their abstract was initially presented at an ISPOR meeting, indicating that either ISPOR or the author (if published as open access) holds the copyright to the abstract. If ISPOR is the copyright holder, the following credit line must be published with the republication of the abstract: “© 2023 International Society for Pharmacoeconomics and Outcomes Research. Reused with permission. This abstract was accepted and previously presented at the ISPOR Europe 2023 conference; Copenhagen, Denmark. All rights reserved.”
