

ISPOR 22nd Annual International Meeting: Boston, MA USA

We broke format and broke records in Boston. The conference drew 4,195 attendees representing 76 countries—the largest attendance to date for ISPOR’s Annual International Meeting. The conference theme, **Evidence and Value in a Time of Social and Policy Change**, set the stage for lively discussion-style plenaries and relevant health policy-focused sessions.

These photos highlight a few of the events and activities from the Boston meeting. To access the videos of the plenary sessions, the released presentations, and video highlights from the meeting, visit www.ispor.org/Event/Index/2017Boston.
